

SAFE STEPS SECURITY STATEMENT

At Safe Steps Ltd we take the security of our customer's data seriously. This is reflected in our approach to both the design and delivery of our products with security and privacy at the forefront of our development.

OUR SECURITY CREDENTIALS

We are working towards being an [ISO 27001:2017](#) certified company and employ the [NHS Digital Developer guidelines](#) within our IT systems.

We carry out an annual [NHS Data Security and Protection](#) health check.

With data protection being at the core of our daily practises, we operate robust internal policies to protect all of the data that we process and store. We use only fully [ISO certified](#) suppliers for our data centre hosting and storage.

[Rackspace](#) are a well-established global hosting provider with comprehensive security credentials.
